

## SPoT Satellite Messenger Coverage

Last Updated 11/1/2007. Estimated coverage area. Actual coverage may vary.

Success rates are forecasts for a SPOT messenger to successfully deliver a single message during a 20-minute period, based on network availability. Additionally, in everyday conditions it is normal for some messages to be blocked by your environment, such as hills or buildings. That's why the SPOT Messenger is scheduled to automatically send multiple messages in every mode – giving you excellent overall reliability.
